**SOUTH WEST SCOTLAND
RENEWABLES CONNECTION PROJECT:
ENVIRONMENTAL STATEMENT**

Volume 3: Figures

December 2008

VOLUME THREE: FIGURES

INTRODUCTION	
1.1	Location of Wind Farms Requiring Connection
1.2	South West Scotland Project: Components
1.3	Wind Farms and Associated Grid Connections
THE ROUTEING PROCESS	
4.1	Examples of South West Scotland Project Routeing Stages
THE ENVIRONMENTAL IMPACT ASSESSMENT	
5.1	Coal Resources and Mining Activity
5.2	Locations of Developments Considered in Cumulative Assessment
DEVELOPMENT DESCRIPTION	
6.1	Part A: Coylton Substation Extension and 400kV Overhead Line and Meikle Hill Substation
6.2	Part A: Coylton Substation and Proposed Extension Schematic Layout
6.3	Part A: Meikle Hill Substation Schematic Layout
6.4	Part A: Components of 275/400kV L8c Steel Lattice Tower (3-phase twin conductors)
6.5 (a-e)	Part A: Coylton Substation Extension and 400kV Overhead Line and Meikle Hill Substation
6.6	Part B: Black Hill Substation and 132kV Overhead Line to Meikle Hill Substation
6.7	Part B: Black Hill Substation Schematic Layout
6.8	Part B: Components of 132kV L7c Steel Lattice Tower (3-phase twin conductors)
6.9 (a-e)	Part B: Black Hill Substation and 132kV Overhead Line to Meikle Hill Substation
6.10	Part C: Glenglass Substation and 132kV Overhead Line to Black Hill Substation
6.11	Part C: Glenglass Substation Schematic Layout
6.12	Part C: Components of 132kV L7c Steel Lattice Tower (3-phase single conductor)
6.13 (a-d)	Part C: Glenglass Substation and 132kV Overhead Line to Black Hill Substation
6.14	Part D1: 132 kV Overhead Line from Kyle (North) Wind Farm to Meikle Hill Substation
6.15	Parts D1 and D2: Components of 132kV Flat Formation Wood Pole
6.16 (a-b)	Part D1: 132kV Overhead Line from Kyle (North) Wind Farm to Meikle Hill Substation
6.17	Part D2: 132kV Overhead Line from Dersalloch Wind Farm to Meikle Hill Substation
6.18 (a-c)	Part D2: 132kV Overhead Line from Dersalloch Wind Farm to Meikle Hill Substation
6.19	Part D3: Dun Hill Substation and 132kV Underground Cable Connection
6.20	Part D3: Dun Hill Substation Schematic Layout
6.21	Typical Underground Cable Cross-Section: 132kV Part D3 and 33kV Part D4
6.22	Part D3: Dun Hill Substation and 132kV Underground Cable Connection
6.23	Part D4: 33kV Underground Cable Connection from Pencloe Wind Farm to Black Hill Substation
6.24	Part D4: 33kV Underground Cable Connection from Pencloe Wind Farm to Black Hill Substation
FELLING, CONSTRUCTION AND OPERATIONAL MAINTENANCE	
7.1	Indicative Temporary Construction Compound Layouts
7.2 (a)	Construction Access Points: Parts A, D1+D2
7.2 (b)	Construction Access Points: Parts B, C, D3 + D4
7.3	Temporary Access Track Types
7.4	Photographs of Typical Watercourse Crossings and Road/Rail Crossings
7.5	Steel Tower Construction
7.6	Flat Formation Wood Pole Construction
7.7	Typical Substation During and After Construction
PLANNING POLICY CONTEXT	
8.1	Local Authority Boundaries
LANDSCAPE	
9.1	Study Area for Landscape Assessment
9.2	Landscape Character Types within Study Area
9.3	Landscape Designations within Study Area
9.4 (a-f)	Landscape Character Types Superimposed on Perceptibility ZTV Part A: Coylton Substation Extension and 400kV Overhead Line and Meikle Hill Substation
9.5 (a-d)	Landscape Character Types Superimposed on Perceptibility ZTV Part B: Black Hill Substation and 132kV Overhead Line to Meikle Hill Substation
9.6 (a-d)	Landscape Character Types Superimposed on Perceptibility ZTV Part C: Glenglass Substation and 132kV Overhead Line to Black Hill Substation
9.7 (a-d)	Landscape Character Types Superimposed on Perceptibility ZTV Part D1: 132kV Overhead Line from Kyle (North) Wind Farm to Meikle Hill Substation
9.8 (a-d)	Landscape Character Types Superimposed on Perceptibility ZTV Part D2: 132kV Overhead Line from Dersalloch Wind Farm to Meikle Hill Substation
9.9	Landscape Character Types Superimposed on Perceptibility ZTV Part D3: Dun Hill Substation and 132kV Underground Cabled Connection
9.10	Landscape Character Types Superimposed on Perceptibility ZTV Part D4: 33kV Underground Cabled Connection from Pencloe Wind Farm to Black Hill Substation
9.11	Landscape Character Types Superimposed on Perceptibility ZTV

9.12 Landscape Character Types Superimposed on Cumulative Zone of Theoretical Visibility (CZTV)

VISUAL AMENITY

- 10.1 Viewpoint Locations Superimposed on Perceptibility ZTV
- 10.2 Viewpoint Locations Superimposed on Perceptibility ZTV
Part A: Coylton Substation Extension and 400kV Overhead Line and Meikle Hill Substation
- 10.3 Viewpoint Locations Superimposed on Perceptibility ZTV
Part B: Black Hill Substation and 132kV Overhead Line to Meikle Hill Substation
- 10.4 Viewpoint Locations Superimposed on Perceptibility ZTV
Part C: Glenglass Substation and 132kV Overhead Line to Black Hill Substation
- 10.5 Viewpoint Locations Superimposed on Perceptibility ZTV
Part D1: 132kV Overhead Line from Kyle (North) Wind Farm to Meikle Hill Substation
- 10.6 Viewpoint Locations Superimposed on Perceptibility ZTV
Part D2: 132kV Overhead Line from Dersalloch Wind Farm to Meikle Hill Substation
- 10.7 Viewpoint Locations Superimposed on Perceptibility ZTV
Part D3: Dun Hill Substation and 132kV Underground Cabled Connection
- 10.8 Viewpoint Locations Superimposed on Perceptibility ZTV
Part D4: 33kV Underground Cabled Connection from Pencloe Wind Farm to Black Hill Substation
- 10.9 (a-d) Viewpoint 1: Drongan
- 10.10 (a-e) Viewpoint 2: B741 Sillyhole Moss
- 10.11 (a-d) Viewpoint 3: B7036, Ochiltree
- 10.12 (a-d) Viewpoint 4: Minor road, east of Rodinghead
- 10.13 (a-d) Viewpoint 6: Junction of minor road and B7046
- 10.14 (a-d) Viewpoint 7: B7046, north of Belston Loch
- 10.15 (a-d) Viewpoint 8: Junction of minor road and track, Clydenoch
- 10.16 (a-d) Viewpoint 11: B7046, west of Skares
- 10.17 (a-d) Viewpoint 12: Dalgig
- 10.18 (a-e) Viewpoint 13: B741, Maneight
- 10.19 (a-d) Viewpoint 14: Rankinston
- 10.20 (a-d) Viewpoint 15: Tarelgin, A70
- 10.21 (a-d) Viewpoint 16: A70
- 10.22 (a-e) Viewpoint 17: B741, Upper Beoch turn off
- 10.23 (a-e) Viewpoint 18: B741, lay-by Meikle Hill
- 10.24 (a-c) Viewpoint 19: Forest track, Clawfin Hill
- 10.25 (a-d) Viewpoint 20: Wee Berbeth Loch, Knockmore
- 10.26 (a-f) Viewpoint 23: Enoch Hill
- 10.27 (a-d) Viewpoint 24: Forest track, Stannery Knowe
- 10.28 (a-c) Viewpoint 25: Forest track, Water of Deugh
- 10.29 (a-d) Viewpoint 27: Gallow Rig
- 10.30 (a-f) Viewpoint 28: Forest Track, White Knowes
- 10.31 (a-f) Viewpoint 29: Cairnsmore of Carsphairn
- 10.32 (a-e) Viewpoint 31: Blacklorg Hill
- 10.33 (a-d) Viewpoint 32: Alwhat

- 10.34 (a-d) Viewpoint 33: Afton Reservoir
- 10.35 (a) Viewpoint 34: Allans Cairn, Southern Upland Way
- 10.36 (a-f) Viewpoint 36: Minor road, Glenglass
- 10.37 (a-f) Viewpoint 38: B741, Grimmet Hill
- 10.38 (a-e) Viewpoint 39: A713, Doon Valley
- 10.39 (a-e) Viewpoint 41: Dalmellington
- 10.40 (a-e) Viewpoint 42: Burnton
- 10.41 (a-e) Viewpoint 43: A713
- 10.42 (a-f) Viewpoint 46: Benbeoch
- 10.43 (a-f) Viewpoint 47: Struthers Brae
- 10.44 View Point Locations Superimposed on Cumulative Zone of Theoretical Visibility (CZTV)
- 10.45 (a-c) Residential Property/ Cluster Locations Superimposed on Perceptibility ZTV

HYDROLOGY, HYDROGEOLOGY AND WATER RESOURCES

- 11.1 Hydrology, Hydrogeology and Water Resources
- 11.2 (a-b) Hydrological Features
Part A: Coylton Substation Extension and 400kV Overhead Line and Meikle Hill Substation
- 11.3 (a-b) Hydrological Features
Part B: Black Hill Substation and 132kV Overhead Line to Meikle Hill Substation
- 11.4 (a-b) Hydrological Features
Part C: Glenglass Substation and 132kV Overhead Line to Black Hill Substation
- 11.5 Hydrological Features
Part D1: 132kV Overhead Line from Kyle (North) Wind Farm to Meikle Hill Substation
- 11.6 (a-b) Hydrological Features
Part D2: 132kV Overhead Line from Dersalloch Wind Farm to Meikle Hill Substation
- 11.7 Hydrological Features
Part D4: 33kV Underground Cable Connection from Pencloe Wind Farm to Black Hill Substation

ECOLOGY

- 12.1 Sites Designated for Nature Conservation
- 12.2 (a-e) Phase 1 Habitat Survey
Part A: Coylton Substation Extension and 400kV Overhead Line and Meikle Hill Substation
- 12.3 Water Vole and Otter Survey (2007)
Part A: Coylton Substation Extension and 400kV Overhead Line and Meikle Hill Substation
- 12.4 Bat Roost Potential, Bat and Red Squirrel Survey (2007)
Part A: Coylton Substation Extension and 400kV Overhead Line and Meikle Hill Substation
- 12.5 Great Crested Newt Survey GCN (2007)
Part A: Coylton Substation Extension and 400kV Overhead Line and Meikle Hill Substation

- 12.6 (a-e) Phase I Habitat Survey Part B and D3:
B: Black Hill Substation and 132kV Overhead Line to Meikle Hill Substation
D3: Dun Hill Substation and 132kV Underground Cable Connection
- 12.7 Water Vole and Otter Survey (2007)
Part B: Black Hill Substation and 132kV Overhead Line to Meikle Hill Substation
- 12.8 Red Squirrel Survey (2007)
Part B: Black Hill Substation and 132kV Overhead Line to Meikle Hill Substation
- 12.9 (a-d) Phase I Habitat Survey
Part C: Glenglass Substation and 132kV Overhead Line to Black Hill Substation
- 12.10 Water Vole and Otter Survey (2007)
Part C: Glenglass Substation and 132kV Overhead Line to Black Hill Substation
- 12.11 Red Squirrel Survey (2007)
Scheme Part C: Glenglass Substation and 132kV Overhead Line to Black Hill Substation
- 12.12 (a-b) Phase I Habitat Survey
Part D1: 132kV Overhead Line from Kyle (North) Wind Farm to Meikle Hill Substation
- 12.13 Otter Survey (2007)
Part D1: 132kV Overhead Line from Kyle (North) Wind Farm to Meikle Hill Substation
- 12.14 Red Squirrel Survey (2007)
Part D1: 132kV Overhead Line from Kyle (North) Wind Farm to Meikle Hill Substation
- 12.15 (a-c) Phase I Habitat Survey
Part D2: 132kV Overhead Line from Dersalloch Wind Farm to Meikle Hill Substation
- 12.16 Water Vole and Otter Survey (2007)
Part D2: 132kV Overhead Line from Dersalloch Wind Farm to Meikle Hill Substation
- 12.17 Bats Roost Potential, Bats and Red Squirrel Survey (2007)
Part D2: 132kV Overhead Line from Dersalloch Wind Farm to Meikle Hill Substation
- 12.18 Great Crested Newt Survey (2007)
Part D2: 132kV Overhead Line from Dersalloch Wind Farm to Meikle Hill Substation
- 12.19 Red Squirrel Survey (2007)
Part D3: Dun Hill Substation and 132kV Underground Cabled Connection
- 12.20 Phase I Habitat Survey
Part D4: 33kV Underground Cable Connection from Pencloe Wind Farm to Black Hill Substation

ORNITHOLOGY

- 13.1 Ornithological Broad-Scale Study Area
- 13.2 Ornithological Survey Areas
- 13.3 Measures to Reduce Bird Collisions
- 13.4 Flight Activity by Key Species: Raptor and Owl
- 13.5 Black Grouse Observations
- 13.6 Flight Activity by Swans and Geese of High Nature Conservation Importance
- 13.7 Flight Activity by Waders of High/Moderate Nature Conservation Importance
- 13.8 Restrictions on Forestry and Construction Works

CULTURAL HERITAGE

- 14.1 Setting: Cultural Heritage Features Superimposed on Perceptibility ZTV

- 14.2 (a-b) Cultural Heritage Features within the Broad Corridor Study Area
Part A: Coylton Substation Extension and 400kV Overhead Line and Meikle Hill Substation
- 14.2 (c) Cultural Heritage Features Superimposed on Perceptibility ZTV
Part A: Coylton Substation Extension and 400kV Overhead Line and Meikle Hill Substation
- 14.3 (a-d) View from Auchencloigh Castle
- 14.4 (a-b) Cultural Heritage Features within the Broad Corridor Study Area
Part B: Black Hill Substation and 132kV Overhead Line to Meikle Hill Substation
- 14.4 (c) Cultural Heritage Features Superimposed on Perceptibility ZTV
Part B: Black Hill Substation and 132kV Overhead Line to Meikle Hill Substation
- 14.5 (a-b) Cultural Heritage Features within the Broad Corridor Study Area
Part C: Glenglass Substation and 132kV Overhead Line to Black Hill Substation
- 14.5 (c) Cultural Heritage Features Superimposed on Perceptibility ZTV
Part C: Glenglass Substation and 132kV Overhead Line to Black Hill Substation
- 14.6 (a) Cultural Heritage Features within the Broad Corridor Study Area
Part D1: 132kV Overhead Line from Kyle (North) Wind Farm to Meikle Hill Substation
- 14.6 (b) Cultural Heritage Features Superimposed on Perceptibility ZTV
Part D1: 132kV Overhead Line from Kyle (North) Wind Farm to Meikle Hill Substation
- 14.7 (a-b) Cultural Heritage Features within the Broad Corridor Study Area
Part D2: 132kV Overhead Line from Dersalloch Wind Farm to Meikle Hill Substation
- 14.7 (c) Cultural Heritage Features Superimposed on Perceptibility ZTV
Part D2: 132kV Overhead Line from Dersalloch Wind Farm to Meikle Hill Substation
- 14.8 (a) Wireframe View from Red Burn Bridge NSR Site 7159
- 14.9 Cultural Heritage Features within the Broad Corridor Study Area
Part D3: Dun Hill Substation and 132kV Underground Cable Connection
- 14.10 Cultural Heritage Features within the Broad Corridor Study Area
Part D4: 33kV Underground Cable Connection from Pencloe Wind Farm to Black Hill Substation

TRAFFIC AND TRANSPORT

- 15.1 Public Road Network
- 15.2 Abnormal Load Access Routes

FELLING AND CONSTRUCTION NOISE

- 16.1 Noise Sensitive Receptors

FORESTRY

- 17.1 Forestry Study Area
- 17.2 Felling and Windthrow Areas
Part A: Coylton Substation Extension and 400kV Overhead Line and Meikle Hill Substation
- 17.3 Felling and Windthrow Areas
Part B: Black Hill Substation and 132kV Overhead Line to Meikle Hill Substation

- 17.4 Felling and Windthrow Areas
Part C: Glenglass Substation and 132kV Overhead Line to Black Hill Substation
- 17.5 Felling and Windthrow Areas
Part D1: 132kV Overhead Line from Kyle (North) Wind Farm to Meikle Hill Substation
- 17.6 Felling and Windthrow Areas
Part D2: 132kV Overhead Line from Dersalloch Wind Farm to Meikle Hill Substation
- 17.7 Felling and Windthrow Areas
Part D3: Dun Hill Substation and 132kV Underground Cabled Connection
- 17.8 Felling and Windthrow Areas
Part D4: 33kV Underground Cabled Connection from Pencloe Wind Farm to Black Hill Substation

SOCIAL AND ECONOMIC EFFECTS

- 18.1 Recreation and Tourism Resources Superimposed on Perceptibility ZTV

SUMMARY OF LIKELY SIGNIFICANT EFFECTS

- 19.1 Summary of Likely Significant Residual Effects
Part A: Coylton Substation Extension and 400kV Overhead Line and Meikle Hill Substation
- 19.2 Summary of Likely Significant Residual Effects
Part B: Black Hill Substation and 132kV Overhead Line to Meikle Hill Substation
- 19.3 Summary of Likely Significant Residual Effects
Part C: Glenglass Substation and 132kV Overhead Line to Black Hill Substation
- 19.4 Summary of Likely Significant Residual Effects
Part D1: 132kV Overhead Line from Kyle (North) Wind Farm to Meikle Hill Substation
- 19.5 Summary of Likely Significant Residual Effects
Part D2: 132kV Overhead Line from Dersalloch Wind Farm to Meikle Hill Substation
- 19.6 Summary of Likely Significant Residual Effects
Part D3: Dun Hill Substation and 132kV Underground Cabled Connection
- 19.7 Summary of Likely Significant Residual Effects
Part D4: 33kV Underground Cabled Connection from Pencloe Wind Farm to Black Hill Substation
