

Newlands Hill Wind Energy Hub 132 kV Connection Project

Thank you for taking the time to attend our event today. We are seeking your views on our proposal for a 132 kV overhead line to connect the proposed Newlands Hill Wind Energy Hub to the substation at the existing Fallago Rig Wind Farm. The connection passes through the East Lothian and Scottish Borders administrative areas.

The grid connection would need to cross the Fallago Rig Wind Farm site, which is a highly constrained area. As such, a number of options would need be considered in this area to overcome the design and technical constraints of crossing an operational wind farm site. The routeing for a grid connection through the wind farm site would be subject to detailed design at future project stages to determine the most technically feasible and economically viable solution.

Please complete the questionnaire below to help us understand your concerns and feedback.

If you would prefer to provide an overall comment, please answer Question 4 only.

Name:

Email and/or Home Address:

If you would like us to keep in touch regarding this project, please provide your contact details. Your details will remain confidential and will not be shared to any third party.

1. Do you have any comments regarding the routes proposed?
2. Are there any changes to any of the routes that you suggest? Please provide reasons as to why you would prefer an alternative route.
3. We have undertaken a landscape-led site walkover to determine route options for the Scheme. Are there any environmental or technical constraints we have not identified in our assessments?
4. Do you have any concerns or comments about the Scheme?
5. Did you find the exhibition today informative?
Yes No
6. How effective was the exhibition in helping you understand our Scheme? Is there any other information that you would find helpful?
Comments
How did you hear about the exhibition? Do you have any suggestions for making our event better or more informative? E.g. location, level of interaction, facilities, delivery of information etc.

Thank you for taking the time to complete our survey on Newlands Hill Wind Energy 132 kV Connection Project. Your comments will inform our ongoing design and assessment work in future project stages before an application for consent is submitted to the Scottish ministers for consideration.
