

Glenmuckloch to Redshaw Reinforcement Project

We'd like your views!

Scotland is a world leader in the fight against climate change.

Our country has a target of Net Zero carbon emissions by 2045, with the UK aiming for Net Zero by 2050.

To help meet those targets, SP Energy Networks needs to strengthen Scotland's electricity transmission network so we can transport increasing amounts of clean, green energy from where it's produced to where it's needed.

Our upgrade work includes a new transmission line connecting the proposed new substation at Glenmuckloch to the proposed new Redshaw substation, close to the M74 in South Lanarkshire.

We have identified a preferred route for the proposed new overhead line, and we would like to hear local people's views to help us develop our plans.

Our public consultation runs from **Monday 26 February 2024 to Thursday 28 March 2024.**

We are holding three public exhibitions where you can view our plans and talk to the project team. You can also find more information on our website www.spenergynetworks.co.uk/pages/grrp/asp

You can leave comments on the website, and you can also contact us in the following ways:

Phone: 0800 0217890

Email: grrp@communityrelations.co.uk

Post: FREEPOST SPEN GRRP

At this stage, your comments are not representations to the planning authority. If we do make an application for development consent in future, you will be able to make formal representations at that stage.
