

## We'd like your views!

Scotland is producing more clean, green energy than ever before, and we need to strengthen the transmission network so we can get it to the homes, schools and businesses that need it. One of the ways we increase capacity is by building new infrastructure to transmit more electricity securely and reliably.

Eastern Green Link 4 (EGL4) is a new High Voltage Direct Current (HVDC) subsea electrical link that will connect Fife in Scotland with Norfolk in England. The EGL4 project will play a key role in the fight against climate change, and the UK's transition to Net Zero.

We have identified a preferred route for the onshore cables between a landfall point on the coast near Kinghorn and Westfield, near Ballingry, where we need to build a new converter station close to the existing substation.

We are holding three public exhibitions where you can view our plans and talk to the project team. You can also find more information on our website [https://www.spenergynetworks.co.uk/pages/eastern\\_green\\_link\\_4.aspx](https://www.spenergynetworks.co.uk/pages/eastern_green_link_4.aspx)

You can leave comments on the website, and you can also contact us in the following ways:

**Phone: 0800 0217890**

**Email: [egl4@communityrelations.co.uk](mailto:egl4@communityrelations.co.uk)**

**Post: FREEPOST SPEN EGL4**

At this stage, your comments are not representations to the planning authority. When we make an application for development consent in the future, you will be able to make formal representations at that stage.

## Public exhibitions

Date	Location
Tuesday 23 April 2.00pm – 7.00pm	Benarty Centre, Flockhouse Avenue, <b>Ballingry</b> KY5 8JH
Wednesday 24 April 9.00am - 12.30pm	Auchtertool Village Hall, Main Street, <b>Auchtertool</b> KY2 5XW
Thursday 25 April 3.30pm - 7.30pm	Kinghorn Community Centre, Rossland Place, <b>Kinghorn</b> KY3 9SS

**Our public consultation runs until Friday 10 May 2024.**
