

Remember to

GARDEN SAFELY

Before carrying out any major DIY in your garden, contact SP Energy Networks for free underground network plans

Take care to avoid underground electrical cables when digging or installing fence posts. Network plans are available from SP Energy Networks

Watch out for overhead power lines when working with ladders, scaffold or when pruning and cutting trees in your garden

Electricity cables and power lines should always be treated as live unless confirmed otherwise by SP Energy Networks

Electricity can jump gaps, always maintain a safe distance from overhead powerlines. For more advice search online for 'HSE GS6'

In the event of an electrical emergency or accident call 999. Or call 105 to report a power cut or damage to our electricity network

BE AWARE AND GARDEN WITH CARE
