

Statement on redactions

We have published our business plan on our website at spenergynetworks.co.uk.

The main 100 page business plan narrative has been published in full, with no redactions.

To aid full transparency for our stakeholders, we are publishing 57 supporting documents alongside the main plan. This includes: Annexes, a summary Business Plan Data Template, Engineering Justification Papers and additional documents including expert reports.

From our main annexes, just three documents have not been published for reasons of national security:

NIS Self-Assessment and Improvement Report
--

NIS-R Cyber Resilience Investment Document
--

NIS-R Cyber Resilience Detailed Costs

One further annex has not been published due to commercial confidentiality:

Business Plan Finance Model (BPFM)

In compliance with Ofgem's Business Plan guidance, we have redacted some material throughout our suite of supporting documents where this information is not suitable for public disclosure.

Any financial figures which have been redacted are for reasons of commercial confidentiality as for example the disclosure of unit cost assumptions has the potential to disadvantage the company in future tendering negotiations.

Any asset information or maps which have been redacted are for reasons of national security to protect critical national infrastructure.

If anyone wishes to query a redaction, please contact us directly via:

riio-t3pmo@spenergynetworks.co.uk
